

Math Lab Information

When: B, C, and D days
7:35-8:05am, 11:35-12:00pm

Where: Room 132

Who: Students grades 7 – 12

Teacher: Ms. Keckler

Math Lab is a great place for students in grades 7-12 to come and get extra clarification on math concepts and/or help with homework problems. Although students are encouraged to first seek additional help from their regular classroom teacher, Math Lab is another great resource and opportunity for students to get all the math help they need. Math Lab is a wonderful resource provided by Ottawa Hills so be sure to take advantage of it and come!

The teacher's role during Math Lab is to circulate among the students and to assist everyone who comes, so in order to provide the best service in a limited time, students should bring SPECIFIC questions or concepts needed for clarification. For help on homework, it is expected that the student has done all of the homework possible, and then comes in with questions on specific problems.

There are no restrictions for the amount of time a student must stay once coming to Math Lab. Students may stay for as long or as little as they want during the allotted times.

Please know that Math Lab is also open to students who simply want a quiet place to study.

A sign-in sheet will be kept by the door and must be signed by any student entering Math Lab. This sheet will serve as a record of attendance and may be viewed by the math teachers as well as parents.

A word of advice: *If you have math questions, don't wait until a test day to try to "cram" information at the last minute, as this rarely leads to a positive outcome. Come to math lab as questions arise or simply come on a regular basis and you will have much more success.*
